Record and playback the meeting

Lync recording captures audio, video, IM, program sharing, PowerPoint presentations, and whiteboards.

1. In the meeting window, click More Options, and then click Start Recording.

2. Use the controls at the bottom of the meeting room to pause, resume, or stop the recording. After the recording is stopped, Lync automatically saves it in a format that plays in Windows Media Player.

To play, rename, or delete a recording, click Manage Recordings on the More Options menu, and click your selection. You can also click Browse to go to the location of the recording and make a copy of the file to post on a shared location for others to view.
