How to call by contact or username:

1. Find a contact by selecting a favorite on your main screen by touching the contact, or selecting **Contacts** using the touch screen. Navigate to the contact by touching, swiping and selecting on the screen. *Note: Both favorites and contacts are set up through the desktop software interface.*
2. Pick up the phone’s handset.
3. To end the call, hang up the phone or select **End Call** using the touch screen.

Transfer quick reference:

<table>
<thead>
<tr>
<th>Skype for Business phones have a default transfer type, which determines the behavior for all transferred calls.</th>
</tr>
</thead>
<tbody>
<tr>
<td>To set default transfer type</td>
</tr>
<tr>
<td>Consultative transfer (Speaking to the person first)</td>
</tr>
<tr>
<td>Blind transfer (sending straight to person)</td>
</tr>
</tbody>
</table>

How to call a phone number:

The best option for dialing is to enter the number and then pick up the phone’s handset.

1. Enter the number using the keypad. Use the back arrow on the touchscreen if you make a mistake.

   **Ways to dial:**
   - ###-####-#### for all numbers, local and long distance
   - 011-###-####... for international

2. To take the call with the handset, lift it from the receiver. To take the call over speakerphone, touch the green phone icon or press the physical speaker phone button.

How to answer a phone call:

When someone calls you, an alert appears on the telephone’s screen and an audible ringing notification plays. To answer the call, do one of the following:

- To use the handset, pick up the handset.
- To use the speakerphone, press the physical **Speaker Phone button** or tap **Answer**.

How to manage multiple calls:

1. Find a contact by selecting a favorite on your main screen by touching the contact, or selecting **Contacts** using the touch screen.
2. Pick up the phone’s handset.
3. To end the call, hang up the phone or select **End Call** using the touch screen.

How to place a call on hold:
1. Select **Hold** using the touch screen.
2. Select **Resume** using the touch screen to continue the call.

How to “blind” transfer a call:

*Note: This has to be chosen as the default setting for all calls in the phone’s settings (see front, top right).*

1. Touch **Transfer** using the touch screen.
2. Enter the 10-digit number, starting with area code, and touch the **green phone icon**. Or, you can select a favorite contact by touching your name in the upper left-hand corner to access your favorites. Or, touch **Contacts** to view your entire contact list. Touch the contact and touch **Dial**.

3. The call will automatically be transferred to the number.

How to “consultative” transfer a call:

*Note: This has to be chosen as the default setting for all calls in the phone’s settings (see front, top right).*

1. Touch and hold **Transfer** on the touch screen.
2. Select **Consultative** using the touch screen.
3. Dial the 10-digit number, starting with area code, and touch the **green phone icon**. Or, you can select a favorite contact by touching your name in the upper left-hand corner to access your favorites. Or, touch **Contacts** to view your entire contact list. Touch the contact and touch **Dial**.
4. Once you have talked to person, touch **Transfer** to transfer the call. Or, touch **Cancel** to talk to the caller again.

How to park a call:

When you park a call, you place the call on hold and receive a three- or four-digit number that can be dialed by anyone using Skype for Business phone service to answer the call.

*Note: Use the Park option to switch from your computer & headset to your desk phone, and vice versa.*

1. With the call under way, select **Park**.
2. You will see the number to retrieve the parked call. Anyone using Skype for Business can dial that number using a phone or the interface to retrieve the call. If you want to pick the call back up, select **Retrieve**.

How to create conference call:

*Note: You will not be able to first speak to the person or people who you are conferencing in.*

1. Once you have initiated a call with the first number, touch **Confnc** using the touch screen.
2. Dial the 10-digit number, starting with area code, and touch the **green phone icon**. Or, you can select a contact by touching **Contacts**, touching a contact, and touching **Dial**.

How to check voicemail:

By default, you will receive email messages for any missed calls or voicemails in the email inbox associated with the number. Or, using the phone:
